

Recombinant MART-1 Antibody / Melan-A [clone MLANA/4475R] (V8661)

| Catalog No. | Formulation | Size |
|----------------|--|--------|
| V8661-100UG | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide | 100 ug |
| V8661-20UG | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide | 20 ug |
| V8661SAF-100UG | 1 mg/ml in 1X PBS; BSA free, sodium azide free | 100 ug |

Recombinant **RABBIT MONOCLONAL**

[Bulk quote request](#)

| | |
|---------------------------|--|
| Availability | 1-3 business days |
| Species Reactivity | Human |
| Format | Purified |
| Host | Rabbit |
| Clonality | Recombinant Rabbit Monoclonal |
| Isotype | Rabbit IgG |
| Clone Name | MLANA/4475R |
| Purity | Protein A affinity chromatography |
| UniProt | Q16655 |
| Localization | Cytoplasmic |
| Applications | Western Blot : 2-4ug/ml Immunohistochemistry (FFPE) : 1-2ug/ml for 30 minutes at RT |
| Limitations | This recombinant MART-1 antibody is available for research use only. |

Western blot testing of human COLO-38 cell lysate with recombinant MART-1 antibody (clone MLANA/4475R). Expected molecular weight ~20 kDa with possible doublet.

IHC staining of FFPE human skin with recombinant MART-1 antibody (clone MLANA/4475R). HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human skin with recombinant MART-1 antibody (clone MLANA/4475R). HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

Description

This antibody recognizes a protein doublet of 20-22kDa, identified as MART-1 (Melanoma Antigen Recognized by T cells 1) or Melan-A. MART-1 is a melanocyte differentiation antigen recognized by autologous cytotoxic T lymphocytes. Seven other melanoma associated antigens recognized by autologous cytotoxic T cells include MAGE-1, MAGE-3, tyrosinase, gp100, gp75, BAGE-1, and GAGE-1. Subcellular fractionation shows that MART-1 is present in melanosomes and endoplasmic reticulum. This MAb labels melanomas and other tumors showing melanocytic differentiation. It is also a useful positive-marker for angiomyolipomas. It does not stain tumor cells of epithelial, lymphoid, glial, or mesenchymal origin.

Application Notes

Optimal dilution of the recombinant MART-1 antibody should be determined by the researcher.

Immunogen

Recombinant full-length human MART-1 protein was used as the immunogen for the recombinant MART-1 antibody.

Storage

Store the recombinant MART-1 antibody at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).
