Description

N-Cadherin/CDH2/Cadherin-2 acts as a regulator of neural stem cells quiescence by mediating anchorage of neural stem cells to ependymocytes in the adult subependymal zone: upon cleavage by MMP24, CDH2-mediated anchorage is affected, leading to modulate neural stem cell quiescence.

Application Notes

Optimal dilution of the recombinant N-Cadherin antibody should be determined by the researcher.

Immunogen

Recombinant full-length human CDH2 protein was used as the immunogen for the recombinant N-Cadherin antibody.

Storage

Aliquot the recombinant N-Cadherin antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
