Description

This antibody reacts to human nuclear factor-kappa-B p105 subunit and p50 subunit.

Application Notes

The stated application concentrations are suggested starting points. Titration of the recombinant NFKB1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A peptide corresponding to residues common in the human NF-kappa-B p105 subunit and p50 subunit was used as the immunogen for the recombinant NFKB1 antibody.

Storage

Store the recombinant NFKB1 antibody at -20oC.
