SDS-PAGE analysis of purified, BSA-free recombinant PCNA antibody (clone rPCNA/8858) as confirmation of integrity and purity.

Description

Recognizes a non-histone protein of 36kDa, which is identified as proliferating cell nuclear antigen (PCNA). It is also known as cyclin or polymerase delta auxiliary protein. Elevated expression of PCNA/cyclin has been shown in the nucleus during late G1 phase immediately before the onset of DNA synthesis, becoming maximal during S-phase and declining during G2 and M phases. This mAb is excellent for multiple applications.

Application Notes

Optimal dilution of the recombinant PCNA antibody should be determined by the researcher.

Immunogen

Recombinant full-length human PCNA protein was used as the immunogen for the recombinant PCNA antibody.

Storage

Aliquot the recombinant PCNA antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
