Western blot testing of mouse brain lysate with recombinant PSD95 antibody at 1:8000 dilution. Predicted molecular weight ~80 kDa but often observed at 90~95 kDa.

IHC testing of formalin fixed and paraffin embedded human brain tissue with recombinant PSD-95 antibody at 1:200 dilution. HIER: steam section in pH6 citrate buffer for 20 min and allow to cool prior to staining.

Description

This antibody reacts to human and mouse PSD95/DLG4. It may also react to rat PSD95, as predicted by immunogen homology

Application Notes

The stated application concentrations are suggested starting points. Titration of the recombinant PSD-95 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A peptide corresponding to the N-terminus of human PSD95 was used as the immunogen for the recombinant PSD-95 antibody.

Storage

Store the recombinant PSD-95 antibody at -20oC.
