Recombinant Retinoblastoma Antibody RB1/7080R / RB1 Rabbit MAb [clone RB1/7080R] (V4327)

Catalog No.	Formulation	Size
V4327-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	100 ug
V4327-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	20 ug
V4327SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug

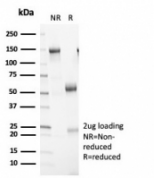

Recombinant RABBIT MONOCLONAL

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Host	Rabbit
Clonality	Recombinant Rabbit Monoclonal
Isotype	Rabbit IgG, kappa
Clone Name	RB1/7080R
Purity	Protein A/G affinity
UniProt	P06400
Localization	Nucleus
Applications	Immunohistochemistry (FFPE): 1-2ug/ml for 30 minutes at RT
Limitations	This Recombinant Retinoblastoma Antibody RB1/7080R is available for research use only.

Recombinant Retinoblastoma Antibody RB1/7080R Immunohistochemistry. IHC staining of FFPE human bladder carcinoma with recombinant Retinoblastoma antibody (clone RB1/7080R). HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

SDS-PAGE analysis of purified, BSA-free recombinant Retinoblastoma antibody (clone RB1/7080R) as confirmation of integrity and purity.

Description

Recombinant Retinoblastoma Antibody RB1/7080R recognizes a 105kDa phosphoprotein, identified as retinoblastoma (Rb) gene product. Its epitope is localized between aa 703-772. It shows no cross reaction with p107 or p130. It specifically stains the nuclei of BT-20 cells and primary human foreskin fibroblast (HFF) cells. It does not stain the Rb-negative BT549 cells. It reacts with the hyperphosphorylated as well as the un (under) phosphorylated form of the Rb protein. Retinoblastoma gene product plays a key role in cell cycle control. It has been identified as a tumor suppressor gene whose loss of its function leads to tumor development. It is widely expressed in a variety of human tissues including breast, esophageal, squamous cell and cervical carcinoma.

Explore our Retinoblastoma Antibody FCD-18, a rabbit monoclonal antibody targeting RB1, for an additional option with Western blot, immunohistochemistry, and immunofluorescence validation.

Application Notes

Optimal dilution of the Recombinant Retinoblastoma Antibody RB1/7080R should be determined by the researcher.

Immunogen

Recombinant human full-length protein was used as the immunogen for the recombinant Retinoblastoma antibody.

Storage

Aliquot the recombinant Retinoblastoma antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
