

## RPL8 Antibody / Ribosomal Protein L8 (RQ6572)

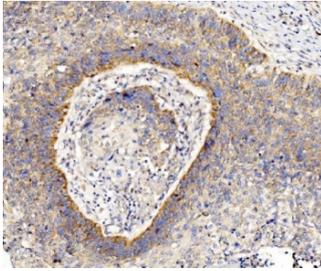

Catalog No.	Formulation	Size
RQ6572	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

### Bulk quote request

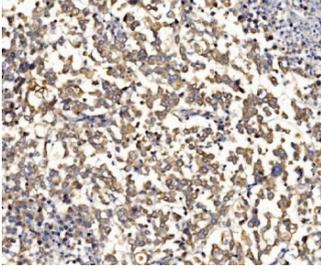

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human, Rat
<b>Format</b>	Antigen affinity purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit IgG
<b>Purity</b>	Antigen affinity purified
<b>Buffer</b>	Lyophilized from 1X PBS with 2% Trehalose
<b>UniProt</b>	P62917
<b>Localization</b>	Cytoplasmic
<b>Applications</b>	Western Blot : 1-2ug/ml Immunohistochemistry (FFPE) : 2-5ug/ml Direct ELISA : 0.1-0.5ug/ml
<b>Limitations</b>	This RPL8 antibody is available for research use only.

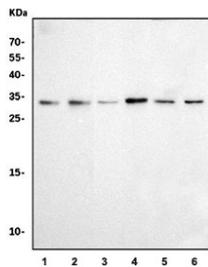

IHC staining of FFPE human liver cancer tissue with RPL8 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human laryngeal squamous cell carcinoma tissue with RPL8 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human pancreatic cancer tissue with RPL8 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

Western blot testing of 1) human HepG2, 2) human Jurkat, 3) human MCF7, 4) human PC-3, 5) rat brain and 6) rat testis tissue lysate with RPL8 antibody. Predicted molecular weight: ~28 kDa.

## Description

60S ribosomal protein L8 is a protein that in humans is encoded by the RPL8 gene. Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L2P family of ribosomal proteins. It is located in the cytoplasm. In rat, the protein associates with the 5.8S rRNA, very likely participates in the binding of aminoacyl-tRNA, and is a constituent of the elongation factor 2-binding site at the ribosomal subunit interface. Alternatively spliced transcript variants encoding the same protein exist. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome.

## Application Notes

Optimal dilution of the RPL8 antibody should be determined by the researcher.

## Immunogen

Recombinant human protein (amino acids R3-N257) was used as the immunogen for the RPL8 antibody.

## Storage

After reconstitution, the RPL8 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
