Description

Regulator of telomere elongation helicase 1 (RTEL1) is an ATP-dependent DNA helicase implicated in telomere-length regulation, DNA repair and the maintenance of genomic stability. [UniProt]

Application Notes

Optimal dilution of the RTEL1 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids D98-K1173) was used as the immunogen for the RTEL1 antibody.

Storage

After reconstitution, the RTEL1 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
