

## Serum Amyloid P Antibody (R31453)

Catalog No.	Formulation	Size
R31453	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

**Bulk quote request**

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Mouse, Rat
<b>Format</b>	Antigen affinity purified
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit IgG
<b>Purity</b>	Antigen affinity
<b>Buffer</b>	Lyophilized from 1X PBS with 2.5% BSA and 0.025% sodium azide
<b>Gene ID</b>	29339
<b>Applications</b>	Western Blot : 0.5-1ug/ml IHC (FFPE) : 0.5-1ug/ml
<b>Limitations</b>	This Serum Amyloid P antibody is available for research use only.

Western blot testing of 1) rat liver and 2) mouse liver tissue with Serum Amyloid P antibody. Predicted molecular weight ~25 kDa.

IHC-P: Serum Amyloid P antibody testing of rat liver tissue. HIER: steamed with pH6 citrate buffer.

## Description

Serum Amyloid P (SAP), also known as PTX2 or APCS, is the identical serum form of amyloid P component (AP), a 25kDa pentameric protein first identified as the pentagonal constituent of in vivo pathological deposits called amyloid. The binding of Serum Amyloid P to proteins in the pathological amyloid cross-beta fold suggests its possible role as a chaperone. This protein is also thought to control the degradation of chromatin.

## Application Notes

Titration of the Serum Amyloid P antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

Rat partial recombinant protein (AA 21-228) was used as the immunogen for this Serum Amyloid P antibody.

## Storage

The lyophilized Serum Amyloid P antibody can be stored at 4oC to -20oC. After reconstitution, aliquot and store at -20oC. Avoid repeated freeze/thaws.
