Description

Recognizes a protein of 74kDa, identified as CD84. It is expressed on mature B cells and on B-cell lines, including pre-B-cell lines, but not on plasma cell lines. Immunohistochemical studies demonstrated that CD84 strongly expressed on tissues macrophages. CD84 is also highly expressed on platelets and, at low levels on peripheral blood T cells. It is a highly N-glycosylated protein and belongs to immunoglobulin superfamily. It may play a role in leukocyte activation.

Application Notes

Optimal dilution of the SLAMF5 antibody should be determined by the researcher.

Immunogen

MLR-stimulated lymphocytes were used as the immunogen for the SLAMF5 antibody.

Storage

Store the SLAMF5 antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
