SDS-PAGE analysis of purified, BSA-free SLC2A1 antibody (clone GLUT1/7308) as confirmation of integrity and purity.

## Description

Recognizes a protein of 55kDa, which is identified as GLUT-1. Glucose transporters are integral membrane glycoproteins involved in transporting glucose into most cells. There are many types of glucose transport carrier proteins, designated as Glut-1 to Glut-12. Glut-1 is a major glucose transporter in the mammalian blood-brain barrier. It is expressed in high density on the membranes of human erythrocytes and the brain capillaries that comprise the blood-brain barrier. Glut-1 is expressed at variable levels in many human tissues. Overexpression of Glut-1 has been linked to tumor progression or poor survival of patients with carcinomas of the colon, breast, cervical, lung, bladder and mesothelioma. Glut-1 is a sensitive and specific marker for the differentiation of malignant mesothelioma (positive) from reactive mesothelium (negative).

## Application Notes

Optimal dilution of the SLC2A1 antibody should be determined by the researcher.

## Immunogen

A recombinant fragment of human GLUT1 protein (within amino acids 200-400) was used as the immunogen for the SLC2A1 antibody.

## Storage

Aliquot the SLC2A1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
