

## SP2 Antibody (R32182)

Catalog No.	Formulation	Size
R32182	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

[Bulk quote request](#)

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human, Rat
<b>Format</b>	Antigen affinity purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit IgG
<b>Purity</b>	Antigen affinity
<b>Buffer</b>	Lyophilized from 1X PBS with 2.5% BSA and 0.025% sodium azide
<b>UniProt</b>	Q02086
<b>Localization</b>	Nuclear
<b>Applications</b>	Western Blot : 0.1-0.5ug/ml
<b>Limitations</b>	This SP2 antibody is available for research use only.

Western blot testing of 1) rat lung, 2) human A549 and 3) HeLa lysate with SP2 antibody. Expected/observed molecular weight ~72 kDa.

## Description

Transcription factor Sp2 is a protein that in humans is encoded by the SP2 gene. This gene encodes a member of the Sp subfamily of Sp/XKLF transcription factors. Sp family proteins are sequence-specific DNA-binding proteins characterized by an amino-terminal trans-activation domain and three carboxy-terminal zinc finger motifs. This protein contains the least conserved DNA-binding domain within the Sp subfamily of proteins, and its DNA sequence specificity differs from the other Sp proteins. It localizes primarily within subnuclear foci associated with the nuclear matrix, and can activate or in

some cases repress expression from different promoters.

## **Application Notes**

Optimal dilution of the SP2 antibody should be determined by the researcher.

## **Immunogen**

Amino acids QVVQIPQQALRVVQAASATLPTVPQKPSQNFQ of human SP2 were used as the immunogen for the SP2 antibody.

## **Storage**

After reconstitution, the SP2 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
