

SSEA-1 Antibody [clone SPM490] (V2523)

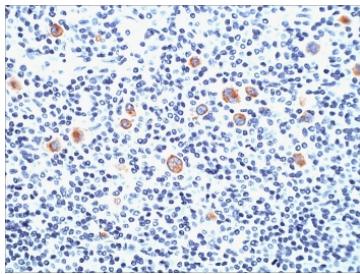

| Catalog No. | Formulation | Size |
|----------------|--|--------|
| V2523-100UG | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide | 100 ug |
| V2523-20UG | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide | 20 ug |
| V2523SAF-100UG | 1 mg/ml in 1X PBS; BSA free, sodium azide free | 100 ug |

| | |
|---------------------------|--|
| Availability | 1-3 business days |
| Species Reactivity | Human |
| Format | Purified |
| Host | Mouse |
| Clonality | Monoclonal (mouse origin) |
| Isotype | Mouse IgM, kappa |
| Clone Name | SPM490 |
| Purity | PEG precipitation |
| UniProt | P22083 |
| Localization | Cell surface and granular paranuclear |
| Applications | Immunofluorescence : 1-2ug/ml Immunohistochemistry (FFPE) : 1-2ug/ml for 30 min at RT |
| Limitations | This SSEA-1 antibody is available for research use only. |

Immunofluorescent staining of human U937 cells with Calponin antibody (clone SPM490, green) and Reddot nuclear stain (red).

IHC: Formalin-fixed, paraffin-embedded human Hodgkin's lymphoma stained with SSEA-1 antibody (clone SPM490).

Description

CD15 plays a role in mediating phagocytosis, bactericidal activity, and chemotaxis. It is present on >95% of granulocytes including neutrophils and eosinophils and to a lesser degree on monocytes. In addition, CD15 is expressed in Reed-Sternberg cells and some epithelial cells. CD15 antibody is very useful in the identification of Hodgkin's disease. CD15 is occasionally expressed in large cell lymphomas of both B and T phenotypes which otherwise have a quite distinct histological appearance.

Application Notes

Optimal dilution of the SSEA-1 antibody should be determined by the researcher.

Immunogen

Myelomonocytic leukemia cells were used as the immunogen for the SSEA-1 antibody.

Storage

Store the SSEA-1 antibody at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).
