Description

This gene encodes an integral membrane protein of small synaptic vesicles in brain and endocrine cells. The protein also binds cholesterol and is thought to direct targeting of vesicle-associated membrane protein 2 (synaptobrevin) to intracellular compartments. Mutations in this gene are associated with an X-linked form of cognitive disability. [RefSeq]

Application Notes

Optimal dilution of the Synaptophysin antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human Synaptophysin / SYP was used as the immunogen for the Synaptophysin antibody.

Storage

Store the Synaptophysin antibody at -20°C.
