Description

Trace amine associated receptor 6, also known as TAAR6, is a protein which in humans is encoded by the TAAR6 gene. This gene encodes a seven-transmembrane G-protein-coupled receptor that likely functions as a receptor for endogenous trace amines. Mutations in this gene may be associated with schizophrenia.

Application Notes

Optimal dilution of the TAAR6 antibody should be determined by the researcher.

Immunogen

Amino acids NIFLVARRQAKKIEN were used as the immunogen for the TAAR6 antibody.

Storage

After reconstitution, the TAAR6 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
