Description

TBP associated factor 4 is part of the TFIID complex, a multimeric protein complex that plays a central role in mediating promoter responses to various activators and repressors. Potentiates transcriptional activation by the AF-2S of the retinoic acid, vitamin D3 and thyroid hormone.

Application Notes

Titration of the TAF4 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 1021-1062 from the human protein was used as the immunogen for the TAF4 antibody.

Storage

Aliquot the TAF4 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
