### Description

T-box Brain protein 2, also called EOMES, is a member of a conserved protein family that shares a common DNA-binding domain, the T-box. T-box genes encode transcription factors involved in the regulation of developmental processes. A similar gene disrupted in mice is shown to be essential during trophoblast development and gastrulation.

### Application Notes

Titration of the TBR2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A portion of amino acids 28-57 from the human protein was used as the immunogen for this EOMES / TBR2 antibody.

## **Storage**

Aliquot the TBR2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
