Description

Thy1 (CD90) antigen is a GPI linked glycoprotein member of the Immunoglobulin superfamily. It is expressed on murine T cells, thymocytes, neural cells, cells of granulocytic lineage, early hematopoietic progenitors, fibroblasts, neurons and Kupffer's cells. Thy1 may play a role in cell to cell or cell to ligand interactions during synaptogenesis and other events in the brain.

Application Notes

Titration of the Thy1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 36-65 from the human protein was used as the immunogen for this Thy1 antibody.

Storage

Aliquot the Thy1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
