Description

The tissue inhibitors of metalloproteinases (TIMPs) inhibit matrix metalloproteinases (MMPs), a group of peptidases involved in degradation of the extracellular matrix. The TIMP4 gene contains 5 exons that span 6 kb of genomic DNA. The gene is expressed as a 1.4-kb transcript abundant in heart and present at low levels in several other tissues. expressed TIMP4 inhibits MMPs in vitro. TIMP4 binds both progelatinase A and the C domain in a similar manner to that of TIMP-2.

Application Notes

The stated application concentrations are suggested starting amounts. Titration of the TIMP4 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

Amino acids 208-224 (YRGHLPLRKEFVDIVQP-human) were used as the immunogen for this TIMP4 antibody.

Storage

Store the TIMP4 antibody at -20oC.
