Description

TNFAIP8L3 (TNF alpha-induced protein 8-like protein 3) belongs to the TNFAIP8 family. It acts as a negative mediator of apoptosis and may play a role in tumor progression. This gene suppresses the TNF-mediated apoptosis by inhibiting caspase-8 activity but not the processing of procaspase-8, subsequently resulting in inhibition of BID cleavage and caspase-3 activation.

Application Notes

The stated application concentrations are suggested starting amounts. Titration of the TNFAIP8L3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

An amino acid sequence from the C-terminus of human TNFAIP8L3 (RPNLKRICEGINKLLDEKVL) was used as the immunogen for this TNFAIP8L3 antibody.

Storage

After reconstitution, the TNFAIP8L3 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
