TNK1 antibody western blot analysis in mouse brain tissue lysate.

Description

TNK1 is involved in negative regulation of cell growth. Has tumor suppressor properties. Plays a negative regulatory role in the Ras-MAPK pathway. May function in signaling pathways utilized broadly during fetal development and more selectively in adult tissues and in cells of the lymphohematopoietic system. Could specifically be involved in phospholipid signal transduction.

Application Notes

Titration of the TNK1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

This TNK1 antibody was produced from a mouse immunized with TNK1 recombinant protein.

Storage

Aliquot the TNK1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
