Description

Tripartite motif-containing 50, also known as TRIM50, is a human gene. Enables identical protein binding activity. Predicted to be involved in protein ubiquitination. Predicted to act upstream of or within regulation of establishment of protein localization. Located in cytosol.

Application Notes

Optimal dilution of the TRIM50 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids K243-L487) was used as the immunogen for the TRIM50 antibody.

Storage

After reconstitution, the TRIM50 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
