Description

Teashirt zinc finger homeobox 1 is a protein that in humans is encoded by the TSHZ1 gene. This gene encodes a colon cancer antigen that was defined by serological analysis of recombinant cDNA expression libraries. The encoded protein is a member of the teashirt C2H2-type zinc-finger protein family and may be involved in transcriptional regulation of developmental processes. Mutations in this gene may be associated with congenital aural atresia syndrome.

Application Notes

Optimal dilution of the TSHZ1 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids K97-R800) was used as the immunogen for the TSHZ1 antibody.

Storage

After reconstitution, the TSHZ1 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
