TUBB2A antibody western blot analysis with HEK293 lysate. Predicted molecular weight ~50 kDa.

### Description

Tubulin is the major constituent of microtubules. It binds two moles of GTP, one at an exchangeable site on the beta chain and one at a non-exchangeable site on the alpha-chain (By similarity).

### Application Notes

Titration of the TUBB2A antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 410-438 from the human protein was used as the immunogen for this TUBB2A antibody.

## Storage

Aliquot the TUBB2A antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
