Description

VDU1 is a deubiquitinating enzyme involved in various processes such as centrosome duplication, cellular migration and beta-2 adrenergic receptor/ADRB2 recycling. Involved in regulation of centrosome duplication by mediating deubiquitination of CCP110 in S and G2/M phase, leading to stabilize CCP110 during the period which centrioles duplicate and elongate. [UniProt]

Application Notes

Titration of the VDU1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 799-829 from the human protein was used as the immunogen for this VDU1 antibody.

Storage

Aliquot the VDU1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
