Description

VEGFR1 is high affinity receptors for vascular endothelial growth factors (VEGFs). On the basis of structural similarity to VEGFR1 and 2, it has been speculated that Flt-4 might represent a third receptor for either VEGF or a VEGF-related ligand.

Application Notes

Variations in protocols, secondaries and substrates may require the VEGFR1 antibody to be titered for optimal performance.

Immunogen

Recombinant human protein was used as the immunogen for this VEGFR1 antibody.

Storage

Store the VEGFR1 antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
