WDR3 antibody western blot analysis in HeLa, K562 lysate.

WDR3 antibody flow cytometric analysis of HeLa cells (green) compared to a [negative control](#) (blue). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

## Description

This gene encodes a nuclear protein containing 10 WD repeats. WD repeats are approximately 30- to 40-amino acid domains containing several conserved residues, which usually include a trp-asp at the C-terminal end. Proteins belonging to the WD repeat family are involved in a variety of cellular processes, including cell cycle progression, signal transduction, apoptosis, and gene regulation.

## Application Notes

Titration of the WDR3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 208-236 from the human protein was used as the immunogen for this WDR3 antibody.

## Storage

Aliquot the WDR3 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
