#### **Description**

Contributes to histone modification. May position the N- terminus of histone H3 for efficient trimethylation at 'Lys-4'. As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3. H3 'Lys-4' methylation represents a specific tag for epigenetic transcriptional activation. As part of the NSL complex it may be involved in acetylation of nucleosomal histone H4 on several lysine residues. May regulate osteoblasts differentiation.

#### **Application Notes**

Titration of the WDR5 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

### **Immunogen**

This WDR5 antibody was produced from a rabbit immunized with a KLH conjugated synthetic peptide between 321-354 amino acids from human WDR5.

## **Storage**

Aliquot the WDR5 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
