WNT2B Antibody (RQ5928)

Catalog No.	Formulation	Size
RQ5928	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human, Mouse, Rat
Format	Antigen affinity purified
Host	Rabbit
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Affinity purified
Buffer	Lyophilized from 1X PBS with 2% Trehalose and 0.025% sodium azide
UniProt	Q93097
Applications	0.5-1ug/ml0.1-0.5ug/ml
Limitations	This WNT2B antibody is available for research use only.

Western blot testing of human 1) HEK293, 2) HepG2, 3) Jurkat, 4) A549, 5) Raji, 6) SW620, 7) SK-O-V3, 8) rat PC-12, 9) mouse Neuro-2a and 10) mouse ANA-1 lysate with WNT2B antibody. Predicted molecular weight ~44 kDa, comonly observed at 44-60 kDa.

Description

WNT2B (Wingless-Type MMTV Integration Site Family Member 2B), is a protein that in humans is encoded by the WNT2B gene. This gene encodes a member of the wingless-type MMTV integration site (WNT) family of highly conserved, secreted signaling factors. Katoh et al. (1996) used fluorescence in situ hybridization to map the WNT13 gene to chromosome 1p13. WNT family members function in a variety of developmental processes including regulation of cell growth and differentiation and are characterized by a WNT-core domain. This gene may play a role in human development as well as human carcinogenesis.

Application Notes

Optimal dilution of the WNT2B antibody should be determined by the researcher.

Immunogen

Recombinant human protein (amino acids A7-T391) was used as the immunogen for the WNT2B antibody.

Storage

After reconstitution, the WNT2B antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
