## Description

This gene shares similarity with the mouse Dhml and the yeast dhp1 gene. The yeast gene is involved in homologous recombination and RNA metabolism, such as RNA synthesis and RNA trafficking. Complementation studies show that Dhml has a similar function in mouse as dhp1. The function of the human gene has not yet been determined. Transcript variants encoding different isoforms have been noted for this gene; however, their full-length nature is not known.

## Application Notes

Titration of the XRN2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 48-76 from the human protein was used as the immunogen for this XRN2 antibody.

## Storage

Aliquot the XRN2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
