ZEB1 antibody western blot analysis in A549 lysate. Predicted molecular weight ~124 kDa but observed at up to ~200 kDa.

ZEB1 antibody flow cytometric analysis of A549 cells (right histogram) compared to a negative control (left histogram). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

Description

This gene encodes a zinc finger transcription factor. The encoded protein likely plays a role in transcriptional repression of interleukin 2. Mutations in this gene have been associated with posterior polymorphous corneal dystrophy-3 and late-onset Fuchs endothelial corneal dystrophy. Alternatively spliced transcript variants encoding different isoforms have been described.

Application Notes

Titration of the ZEB1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 69-97 from the human protein was used as the immunogen for this ZEB1 antibody.

Storage

Aliquot the ZEB1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
